Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, figure 4, relates to a dielectric resonator circuit having a plurality of dielectric resonators being electromagnetically coupled to each other and vertically adjustable relative to each other;

Species II, figure 5, relates to a dielectric resonator circuit having a plurality of dielectric resonators being electromagnetically coupled to each other and horizontally adjustable relative to each other;

Species III, figures 6 and 7, relates to a dielectric resonator circuit having a plurality of dielectric resonators being overlap each other in a vertical plane, and vertically adjustable relative to each other;

Species IV, figures 8A-8C, relates to a dielectric resonator circuit having a plurality of dielectric resonators being electromagnetically coupled to each other, and the resonators are rotatable/tiltable;

Species V, figures 9A-9D, relates to a dielectric resonator circuit having a plurality of dual-mode dielectric resonators being separated by a separating wall, and the upper portion of resonators are tilt toward to the wall an coupled through an iris;

Species VI, figures 10A and 10B, relates to a dielectric resonator circuit having a plurality of dielectric resonators includes non-central longitudinal holes and are rotatable about their longitudinal axis;

Art Unit: 2817

Species VII, figures 11, relates to a dielectric resonator circuit having a pair of adjacent dielectric resonators for each pole and the space between the pair of adjacent resonators are vertically adjustable; and

Species VIII, figures 12A and 12B, relates to a dielectric resonator circuit having a plurality of dielectric resonators are being disposed in a radial pattern in a cylindrical housing and, the position of the resonators are adjustable along their longitudinal axes from outside of the housing.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2817

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Seungsook Ham whose telephone number is (571) 272-2405. The examiner can normally be reached on Monday-Thursday, 8:00AM-5:00PM.
